Design Document

Name of business

Scoots

Product/service/mission

Scoots provide scooters in colleges for ease of mobility around the campus. We aim to make scooters easily accessible to everyone on campus to save time and energy to get to where they need.

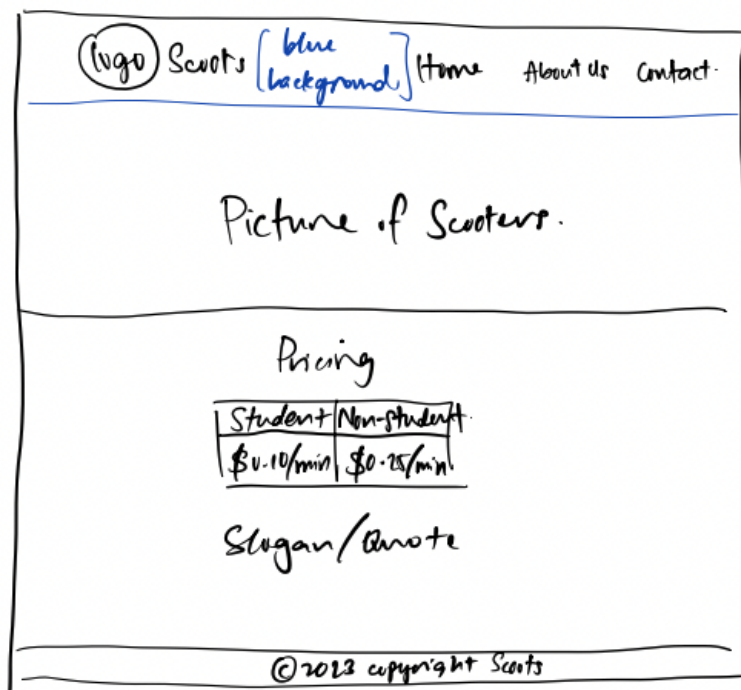

Target demographic

College students

How is the website gonna help the business make money?

Students can check the rental rates for scooters on this website, which is primarily used for promotional purposes. On the website's contact page, users will be able to get in touch with us if they ever have any questions.

Sketch of home page

Content (text) for home page

Other than the navigation bar that includes the company name, Home, About Us and Contact page, it would have a picture of scooters and the cost/min for renting a scooter for students and non-students.

Requirements

You must have at least 3 pages: a home page, a contact page and one other page.

Self explanatory when looked at website

Content must be "real" and realistic. Lorum Ipsum text is not acceptable.

Self explanatory

You must have at least 12 CSS style rules

In style.css, there are more than 12 CSS style rules.

You must have a form

Form is in the contact page

Include a table or a list

Home page has a table that shows pricing of scooter rentals

You must have an external stylesheet

style.css

You must have an internal stylesheet on one of the pages

Home.html has an internal stylesheet

Include at least two images – one must be a background image. The file size of the image

must be less than 60k unless it is for a banner – then it can be up to 120k.

First picture: home page logo

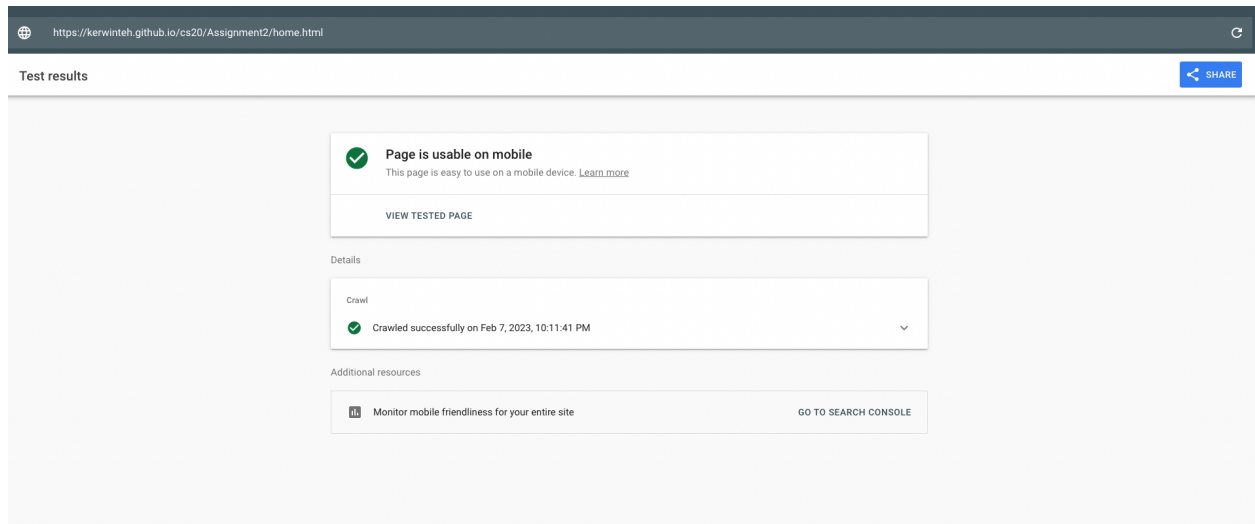

Second picture: home page picture of scooters (background image)

Other pictures: In about.html

You must include at least two fixed page elements to make the site look consistent - for example: header, navigation, sidebar or footer

Navigation and footer

The site must be responsive and pass a mobile-friendly test:

Questions

What was the most satisfying part of this assignment?

Most satisfying part of the assignment was doing the CSS where I could line up everything so it looks good on the website.

What was the most challenging part of this assignment?

Most challenging part of this assignment was definitely the CSS part too. And that's why it was so rewarding
